# FiberOptic Compact Module 7hp 24 SC/PC MM OM4

Compact module, 3U height and 7hp width for the installation of single 3U sub-rack system.
Each unit has the maximum capacity of 24 optical connections in SC.
The front plate has identification by means of being able to identify the optical ports. The module is packaged in a unique cardboard box.
There´s the possibility to include optical splitters in various divisional ratios.

Ready to ASSEMBLE

The module can be assembled in several versions according to each customer specification:

a) **Front Panel**
  1) Light Grey RAL7035
  2) Smooth Black RAL9005

b) **Flangeless SC/PC MM OM3 Adaptors**
  (1) Standard

c) **Pigtails SC/APC easy strip**

  (1) Type of Fibre
    (a)   OM4

  (2) Fibre Color
    (a)   Violet

  (3) Length
    (a)   1 mt
    (b)   1,5 mt
    (c)   2 mt

  (4) Fibre termination in the fusion zone
    (a)   With termination to 900um staggered ends
    (b)   With 250um termination ends, or be it with bare fibre ends
    (c)   Ready-to-Splice or be it with bare fibre ends and fitted with fusion splice Protectors, duly identified from 1-24

Dust Protection

Eye safety shutter
