

SC Adapter

Description

The SC-SC fiber adapter accurately connects the two connectors, transmits the most light source and minimizes the loss, mainly used for fiber-to-cable or fiber-to-device connections. U1 provides a large number of high matching and conversion adapters, including special male/female head conversion fiber adapters. Low insertion loss and good interchangeability. Good repeatability, high temperature resistance, acid and alkali resistance, stable performance and other advantages.

Features

- Simplex and duplex styles;
- High quality zirconia sleeves;
- Available in different color;
- Standard flange, short flange and no flange;
- High density;

Specification

Connector type	SC-SC	Fiber type	Single /multi mode
Insertion loss	$\leq 0.2\text{dB}$	Durability	500 times
Operating temperature	$-25\sim 70^{\circ}\text{C}$	Flame retardant	UL94-V0
Dust proof cap	Black, transparent, semitransparent, built-in, shutter		

Application

- Optical fiber communication systems,
- Cable television networks, local and wide area networks,
- Optical access networks and video transmission.
