

MG 1-00 – DVB-TV Meter

Easy entry through intuitive handling

- ✓ Quick use thanks to DVB-T/T2 and SAT alignment function
- ✓ Ideal for use by installers, electricians and on the construction site
- ✓ Measuring ranges DVB-T/-T2/T2 Lite, DVB-C/-C2 and DVB-S/-S2* (incl. UNICABLE I and II as well as wideband LNBs)
- ✓ Including spectrum analyser and visualisation of the constellation diagram
- ✓ Import of an individual frequency plan possible
- ✓ Level measuring range 20 ... 120 dB μ V
- ✓ Including display of the TV picture

*Extendable to DVB-S2x

Available devices and accessories:

MG 1-00	DVB-TV Meter
MGK 1-00	Meter calibration for MG 1-00
MGS 1-00	Software extension to DVB-S2X for MG 1-00
MGZ 1-00	Carrying bag for MG 1-00
MGZ 1-01	Rain and sun protection kit for MG 1-00
MGZ 2-00	Car charger for MG 1-00
MGZ 3-00	Measuring cable and adapter set for MG 1-00

MG 1-00 – DVB-TV Meter

Qualitative measurement

The measuring device MG 1-00 supports the installation and maintenance of coaxial reception systems. It is used for the qualitative measurement of digital terrestrial television channels, satellite systems or cable networks. The device enables measurements to be made on all digital television standards such as the DVB-C/C2, DVB-T/T2/T2Lite and DVB-S/S2 standards (incl. UNICABLE I and II and Wideband LNBs). Analogue signals can be evaluated in levels. Optionally, the satellite standard DVB-S2X can be integrated.

Touch screen – robust housing – scope of delivery

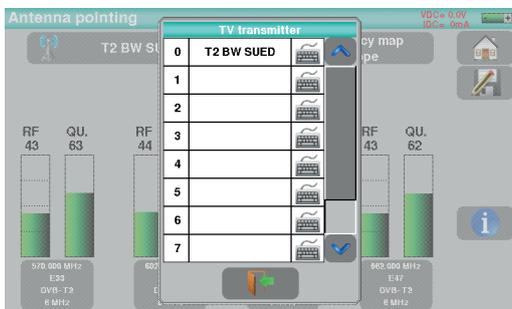

The 7-inch touch screen offers all the advantages of touch screen technology: intuitive access to functions, menus and measurements.

The robust housing with protective bumpers protects the sensitive parts of the measuring device in the field.

The built-in lithium-ion battery with 94 Wh is sufficient for up to 5 hours of operation (depending on use and a remote power supply for LNB or antenna).

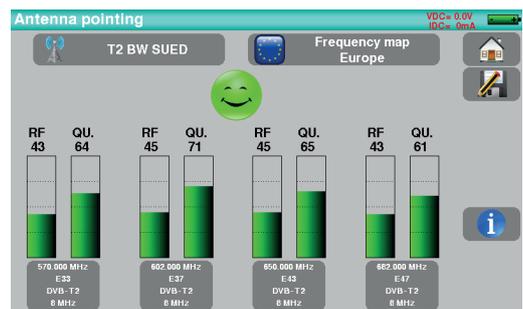

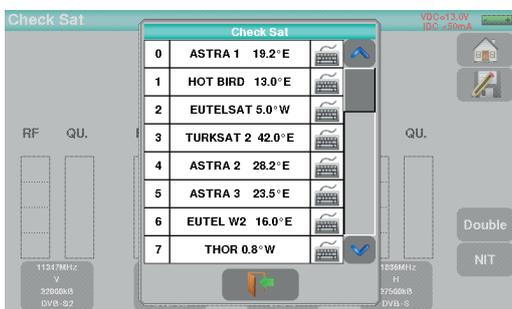

Supplied with F/F adapter, charger, USB stick and carrying case MGZ 1-00.

Thanks to the AXING-MCombiner software tool supplied, measurement protocols can be created conveniently.

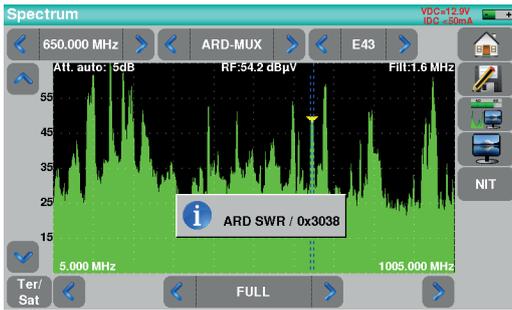

Easy to get started with the terrestrial or SAT alignment function

The meter is supplied with pre-assigned transponder memories. This enables quick alignment of a DVB-T/T2 or SAT antenna. The predefined transponders can be changed or added at any time.

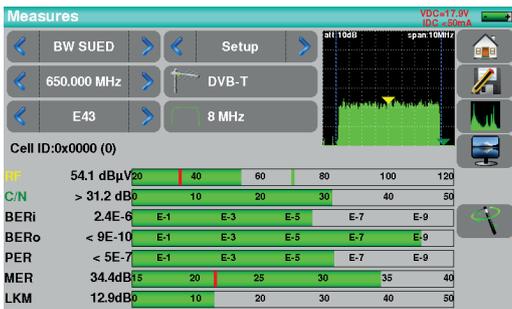

Displaying the TV picture in SD and HD

Thanks to the built-in MPEG decoder, free-to-air SD and HD programmes can be displayed cleanly. This is especially important to show the customer the function of the system. The name of the programme and all important information are also shown.

Spectrum Analyser

With the help of the spectrum analyser, the full spectrum or a partial range of it can be analysed. The evaluation of preset transmitters facilitates the verification of a targeted satellite, for example.

Detailed measurement at a glance

During the measurement, all important measured values such as level, bit error rate (before and after the forward error correction, if applicable), packet errors, MER and system reserve are clearly displayed.

Constellation diagram

In addition to the detailed measurement values, the constellation diagram can be displayed for all supported digital signals. These graphical representations of a digitally modulated signal can be used to detect signal distortion and interference.

Accessories:

MGS 1-00

Software extension for MG 1-00
For measuring DVB-S2X modulated satellite signals
The measuring device must be reprogrammed at AXING

MGZ 3-00

Measuring cable and adapter set for MG 1-00
12.0 m measuring cable
IEC-female to F-female
IEC-male to F-female
IEC-male to F-male, Quickfix
IEC-female to F-male, Quickfix
F-male, Quickfix to IEC-female

MGK 1-00

Meters must be calibrated at regular intervals.
The measuring device must be sent to the factory for this and is checked and recalibrated

MGZ 1-01

Rain and sun protection kit for MG 1-00
Rain cover for working even in the rain
Glare protection for mounting above the display
Belt clip

MGZ 2-00

Car charger for MG 1-00
For charging the device in the car
DC/DC converter 12V to 15V/1A
With adapter for car cigarette lighter and hollow plug 5.5 mm

MGZ 1-00

Replacement for the carrying bag supplied with the MG 1-00

Specifications	CATV / Terrestrial				SAT		
Frequency	5 - 1005 MHz				200 - 2400 MHz		
LNB type	-				C Ku Ku WIDEBAND (LO adjustable)		
Level measurements	20 - 120 dBµV
