

Double stacked trays reduce height

Integrated Routing System

6x fibre splitter management trays

Width D1	Width D2	Length L
275mm	310mm	598mm

### Product Description

The UFCIR with integrated routing has double stacked fibre trays giving an overall length of less than 600mm, the base is manufactured with ABS/PA material making it suitable for use with heat shrink seals and has two oval ports and 28 round ports covering cable diameters between 6.0– 35.0mm. All contained metal work is manufactured from Grade 304 stainless steel and the IR mounting plate is made from Aluminium which accommodates the IR backplane and fibre storage unit. The back plane accommodates a variety of trays to suit the application requirements.
