

Fiber Optical SC Adapter – Specification

Model: SC

Name: Fiber Optical Adapter

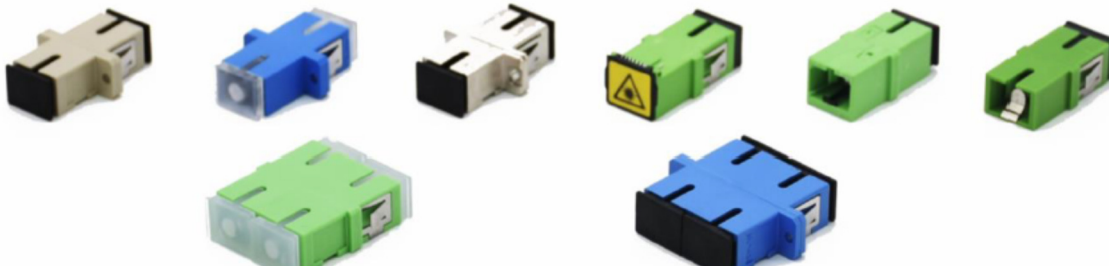

Features

- * Simplex and Duplex styles
- * High quality zirconia sleeves
- * Available in different colors
- * Standard flange, short flange and no flange
- * High density

SC Adapter

Description

The SC-SC fiber adapter accurately connects the two connectors, transmits the most light source and minimizes the loss, mainly used for fiber-to-cable or fiber-to-device. It provides a large number of hiht matching and conversion adapters, including special male/female head conversion fiber adatpers. Low resistance, stable performance and other advantages.

Specification

Connector type	SC-SC	Fiber type	Single /multi mode
Insertion loss	≤0.2dB	Durability	500 times
Operating temperature	-25~70°C	Flame retardant	UL94-V0
Dust proof cap	Black, transparent, semitransparent, built-in, shutter		

Application

- Optical fiber communication systems,
- Cable television networks, local and wide area networks,
- Optical access networks and video transmission.
