

Optical outlet for FTTH client network

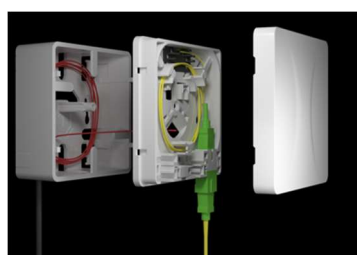

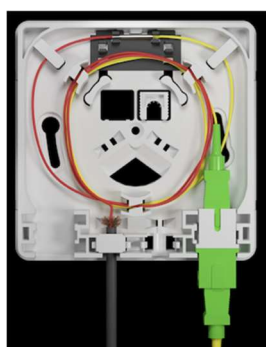

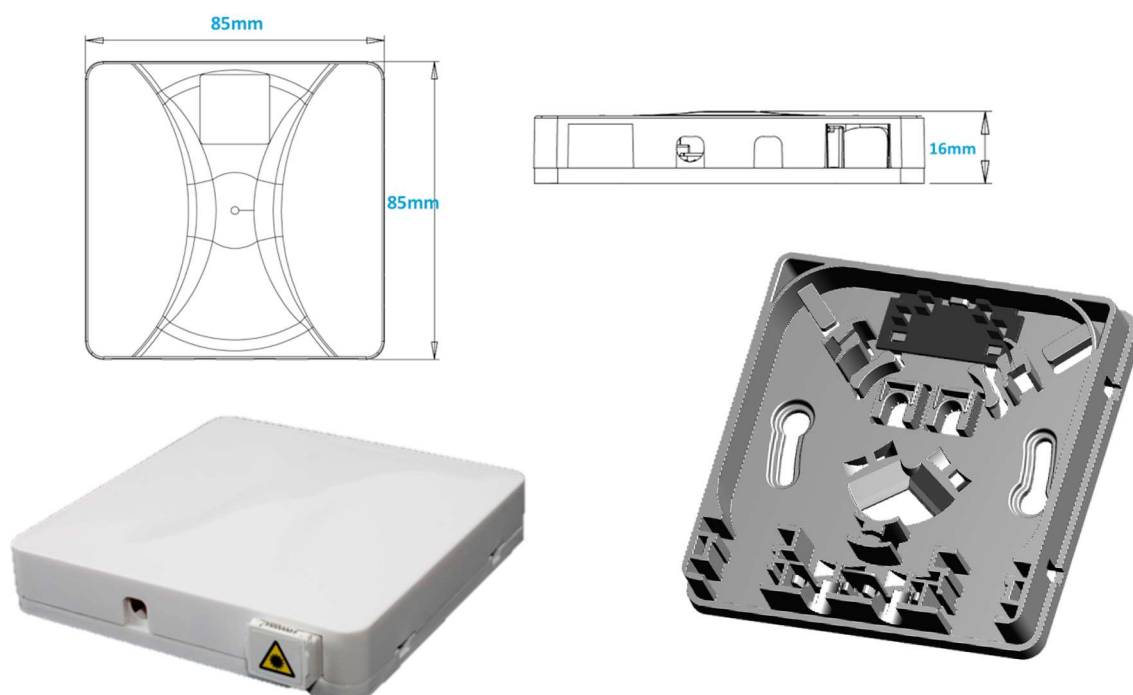

Specifications

- Allows entry of 2 cables by external access if the FO cable is installed in a footer;
- Allows 2 cables to enter the inside of the outlet if the FO cable is installed through the inside of the wall;
- Supports up to a maximum of 2 SC/APC FO adapters/aligners;
- Possibility of direct installation to the wall (by means of hot glue) or in a standard appliance box;
- Attractive design for installation in homes including high gloss cover;
- Unique feature of reduced size of 85x85 so that it fits perfectly when installed adjacent to the electric equipment type Legrand;
- Possibility of customization with telecom operator logo injected into the cover;
- Possibility of full customization of the cover in order to differentiate between operators;
- Ease of assembly in the optics of the installer;
- Perfect routing of the fibers without them loosening easily;
- Production made in Portugal with fast delivery times;
