

12 Pigtail Set LC/PC, OS2, 0.9 mm

Cable parameters

Fibre pigtails are used in permanent connections between patch panels and incoming cables / single blown fibres. Pigtails are preconstructed with connectors. Our connector options include small form factors such as LC or E2000 as well as SC, FC and ST.

We are able to offer this product in many types of configurations with various lengths and multiple colours for easier identification.

About Us

Proudly made in Romania, EU

Our products are made in Romania using the latest technology in the field.

This also ensures quick delivery for all European markets;

Smart and flexible design

Custom designed products in compliance with the client requests;

Powerful testing capabilities

We take testing very seriously so every product can meet the highest quality standards possible;

General Characteristics

- Easy to strip up to 1000 mm;
- Available in many colours for easy identification;
- Tight buffers allow easy and direct field connectorization;

Applications

 Typically used for connecting adapters and splice trays in patch panels;
