

Fiber Optic Launch Box

When an OTDR test device is used it sends a very strong light pulse through the fiber, it is difficult to detect fiber loss within in the first 1000 meters of a Single-Mode line and the first 150 meters of a Multi-Mode line. To counter this problem technicians usually use a fiber optic launch box which has from 150 to 1000 meters of fiber foil, which acts as a buffer range that reduces the light pulse and allows faults and breaks to be detected from the very beginning of of a fiber optic line.

Key Features

- Use as a Pulse Suppressor, OTDR Launch Box, Delay Line, Product Demonstrations, Training, Calibration
- Prevents fiber damage and stress during use or transportation
- Small/Slim/Low profile design
- Mounting holes located on bottom of housing
- Module stacking capability for added flexibility
- Portable for field use
- Up to 1000 meters custom length configurations available
- Singlemode 9/125 A2, Multimode 62.5/125 OM1, Multimode 50/125 OM2 and Multimode 50/125 OM3
- All fiber types are available upon on request

Ordering Codes

Product Code	Description
MT09819	Adapter Type Fiber Optic OTDR Launch Box Single Mode G657.A2 SC UPC/SC UPC 1000 meters
MT09944	Adapter Type Fiber Optic OTDR Launch Box Multimode G651.OM1 SC UPC/SC UPC 150 meters
MT09945	Adapter Type Fiber Optic OTDR Launch Box Multimode G651.OM2 SC UPC/SC UPC 150 meters
MT09946	Adapter Type Fiber Optic OTDR Launch Box Multimode G651.OM3 SC UPC/SC UPC 150 meters
MT09939	Through Type Fiber Optic OTDR Launch Box Single Mode G657.A2 SC UPC/SC UPC 1000 meters
MT09940	Through Type Fiber Optic OTDR Launch Box Single Mode G657.A2 SC UPC/SC APC 1000 meters
MT09941	Through Type Fiber Optic OTDR Launch Box Single Mode G657.A2 SC APC/SC APC 1000 meters
MT09947	Through Type Fiber Optic OTDR Launch Box Multi Mode G651.OM1 SC UPC/SC UPC 150 meters
MT09948	Through Type Fiber Optic OTDR Launch Box Multi Mode G651.OM2 SC UPC/SC UPC 150 meters
MT09949	Through Type Fiber Optic OTDR Launch Box Multi Mode G651.OM3 SC UPC/SC UPC 150 meters
