# SENTAL

FTTH Distribution Box

The distribution box is made of anti-aging ABS plastic material, resistant against mechanical effects.
The cover opens horizontally and is equipped with lock and latch.
The metal plate with adaptor connection swings effortless for easy installation.
Box is fitted with gaskets to protect the optical fibres inside against moisture, dust, wind and the entrance of insects.
Installation is easy, no special tools are required.

The distribution box is suitable for wall and pole installation, the triangle keylock according to industrial standards.

The box may be fitted with SC / APC or FC / PC simplex or duplex adaptors, alternatively with LC quad adaptors, depending on demand.
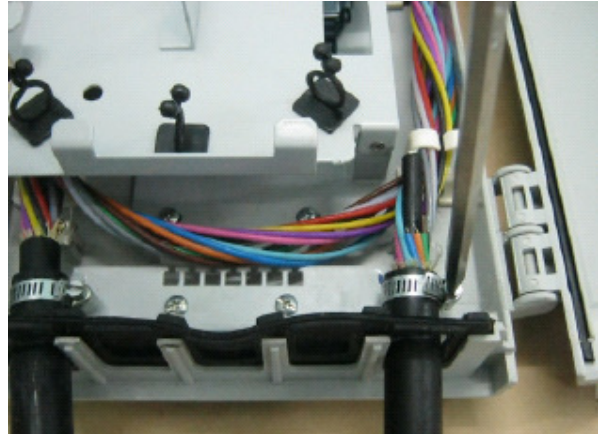

Capacity: 24 fibres with standard adaptors
                  48 fibres with LC quad adaptors
**Dimensions:**   420 x 260 x 110 mm

SENTAL
