

Blue Dragon Jet <u>F</u>xtended

Professional blowing machine designed for blowing microcables. A solid and simple structure ensures easy operation and a longevity of the unit. The high quality of the belt feeder and the power of the pneumatic motors allow the cables to be blown in at a speed of 110 m/min for a distance up to 2.5 km. The machine is equipped with a solid mechanical cable length counter and on request an electronic counter with speed measurement. Two gauges indicate the air pressure on the cylinder head and air motors.

A blowing machine designed for blowing microcables with an extended range and with a special forward/backward switch that allows to withdrawn the cable.

Blue Dragon Jet Extended has CPS (Cable Protection System) - a unique system of cable protection by precise guiding of the moving part of the feeder and "dragon jaws" profiled - sharp teeth ensure a secure fixing of the tubes without reducing the microduct's cross-section.

# You can also be interested in BDJ STANDARD with forward/backward switch that allows to withdrawn the cable.

The BDJ Extended set includes a set of clamping sleeves for microducts and gaskets for any cable size, a 10 m air hose for the compressor and a solid transport box.
